### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 9; after "at least one kind of oxide selected from" add "the group consisting of".

Claims 1 and 5 are allowed.

The following is an examiner's statement of reasons for allowance: the claims are directed toward a solid oxide fuel cell having an electrolyte electrode assembly. A fuel electrode is connected to a first face of a first solid electrolyte. The fuel electrode comprises a cermet of a catalyst and a second solid electrolyte. The second solid electrolyte is scandia-stabilized zirconia containing 9-12 mol% of scandia and at least one kind of oxide selected from the group consisting of yttria and ceria.

The prior art does not teach the claimed second solid electrolyte material for a fuel electrode of a solid oxide fuel cell. Mizutani (JP 07-006768) teaches a second solid electrolyte comprising scandia-stabilized zirconia containing 9-12 mol% of scandia. However, Mizutani (JP 07-006768) does not teach the second solid electrolyte further includes yttria or ceria. Mizutani (JP 2000-340240) teaches a fuel electrode including an electrolyte comprising scandia-stabilized

zirconia containing yttria or ceria. However, Mizutani (JP 2000-340240) is not available as prior art against the claimed invention because the publication date is after the foreign priority date of the instant application. An English translation that supports the claimed invention was filed on 2/12/04.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
